The Asian Banker Technology Implementation Awards 2010

CIMB Group wins the Best Risk and Analytics Project Award 2010

- *CIMB Group wins the Best Risk and Analytics Project Award for implementing an enterprise wide risk management solution*
- *Over 50 financial institutions from 15 countries across the Asia Pacific, Gulf region and Central Asia were evaluated as part of the Technology Implementation Awards Programme 2010*

Singapore, 20 April 2009 – CIMB Group and its partner SAS have been awarded the Best Risk and Analytics Project in the fourth Asian Banker Technology Implementation Awards Programme held at the Asian Civilisations Museum on the evening of 19 April 2010. The awards programme was held in conjunction with the prestigious Asian Banker Summit 2010, the foremost annual meeting for decision makers in the financial services industry in the Asia Pacific region.

The awards programme, administered by The Asian Banker and refereed by prominent global bankers, consultants and academics, is the most prestigious of its kind. A stringent two-month long evaluation process, based on a balanced and transparent scorecard, determined the winners. A full list of winners is provided at the end of this press release.

CIMB Group wins the Best Risk and Analytics Project Award for implementing an enterprise wide risk management solution

CIMB Group won the Best Risk and Analytics Project Award with IT partner SAS for implementing a comprehensive solution that covers enterprise, credit, and operational risk management for the bank. The recent financial crisis that swept the globe has highlighted the importance of risk management, as several of the problems could have been prevented by robust risk management practices.

The implementation of the project enabled CIMB Group to better manage its risk by developing a more robust risk scorecard based on Basel II requirements. The project also featured an end-to-end integration of the relevant functionalities such as data management, analytics, and reporting.

“CIMB Group is now more capable of developing behavioural scores for each customer across different product sets. This greatly improves the bank’s ability to identify and mitigate risks,” says Chris Kapfer, Head of Asian Banker Research. The project is also notable for its ability to support scenario analysis by simulating the effects of customer specified scenarios using relevant techniques such as “What-if?” analyses and stress testing.

“CIMB Group’s Risk Analytics Project with SAS reflected an understanding of the significance of risk management post-crisis. The bank has seen quantifiable impact on the existing business lines in terms of higher profitability and increased market share,” Kapfer says.

Over 50 financial institutions from 15 countries across the Asia Pacific, Gulf region and Central Asia were evaluated as part of the Technology Implementation Awards Programme 2010

The award evaluation process used a comprehensive methodology to evaluate the strength of individual technology implementations. It involved extensive research and tapped the combined experience of a team of experienced researchers and the expertise of an international panel of renowned industry practitioners. The members of the advisory panel are Alex Escucha, Nick Dean, Voranuch Dejakaisaya, Neil Katkov, Mac Kalyan, Steven Miller and Axel Winter.

“The Technology Implementation Awards programme was instituted in 2006 to discover path breaking IT projects that were executed within an acceptable timeframe, and had measurable impact on an institution’s efficiency and profitability,” Kapfer says.
